BEERCRAWL

WHY BEER CRAWL

We give all good beer breweries and venues a fair go

The Australian good beer scene was built on new and small breweries. Since ratings systems for beers can greatly disadvantage smaller and newer breweries and venues, we've left out the ratings system for beers and venues. This way, lovers of beer at different stages and with different tastes can try new beers and venues without bias, and find the new best beer they've ever had.

We prefer quality of information over quantity

We believe accuracy of information is paramount. Therefore, we exclusively display information and images of beer supplied direct by the brewery. We also only accept information about venues if it has been added or confirmed by the venue. International beers are currently being added to our database to accommodate for more bars. We will always prioritise Australian listings.

We're 100% Australian

- We love to support Australian beer—support an Australian beer app!
- 100% Australian created databases, coding and development.
- 100% Australian phone support.
- 100% Australian employees and contractors.

We provide the information, not the opinions

Beer Crawl allows users to save private comments. But we believe there are enough media out there for people to express their opinions to the world, so we don't flood your screen with what every man and his dog thinks.

SUNSET

SUNSET ALE

Brewery: Two Birds Brewing, VIC
Style: Pale Ale
ABV: 4.6%
IBU: 26

Tasting Notes: In 2012, the Two Birds launched their second beer, Sunset.
This beer is an ode to the many adventures they had in their hometown of Perth and the fond memories of red sunsets over the Indian Ocean.

VERIFYING & UPDATING YOUR LISTING

We strive to provide accurate details to our growing user base. You sometimes hear of someone traveling across the city to try a specific beer, only to find it hadn't been served there for some time. This lack of current information can lead to the customer being disappointed and complaining about the venue on social media—and no-one wants that!

We know you're busy. Running a business and tending to customers whilst changing a keg is hectic!

That's why we've made it **70% quicker** for venues to add/update their beers list.

Here's how our Data Verification System works:

BREWERIES:

An automated email is sent every [3 months] to confirm products, and what they are available in. A simple tick to confirm or update will keep your listing looking great!

If you don't have time to respond, you'll receive a follow-up email [1 week] later.

If you choose not to respond, new products and reported discontinued products will not be included in our beer finder app. We also let out growing userbase know when your details were last confirmed.

THIS BREWERY HAS NOT VERIFIED ITS DETAILS SINCE 29/11/2016.

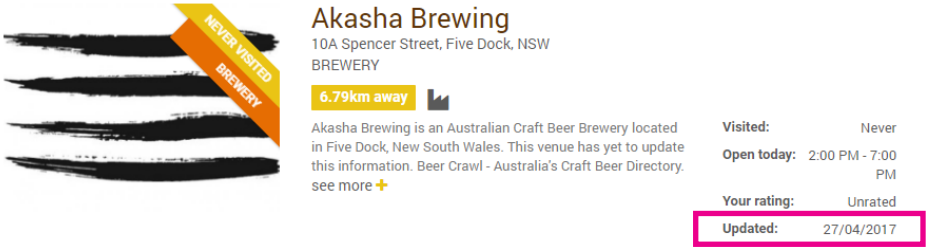
VENUES:
An automated email is sent every [month] to confirm your opening hours and the beers you sell. A simple tick to confirm or update will keep your listing looking great!

If you don't have time to respond, you'll receive a follow-up email [3 days] later.

If you choose not to respond, your venue will not be included in our beer finder app.
We also let our growing userbase know when your details were last confirmed.

THIS VENUE HAS NOT VERIFIED ITS DETAILS SINCE 17/10/2016.

Map results (see here) can be filtered by venues that have updated their listing.



Some of the reasons to keep your listing updated on Beer Crawl:
- Lifetime free listing for all Australian breweries and venues that serve good beer.
- Lifetime free 'beer finder' for your site, venues' sites, and Facebook app integration.
- Supercharged search: users can find your beers by style, ABV range, SRM range, preservative free, or gluten free.

ACCOUNT SYSTEM UPGRADE

We're continuously improving the speed & ease of use of the admin area.
You can manage many entries with just one email account.
Accounts have been split to allow certain people to update certain details.
As a manager of a venue you can create specific accounts for bar staff.

[Owner]

- can manage breweries and venues
- can manage multiple venues & multiple breweries
- can manage Description, Images, Hours
- can add/remove beers
- can verify or deny reported beers.

[Employee - Manager]

- can manage Description, Images, Hours
- can add/remove beers
- can verify or deny reported beers.

[Employee - Staff]

- can add/remove beers
- can verify or deny reported beers.
